

FULL STACK DEVELOPER

Full Stack Developer with **1+ years of experience** building scalable MERN stack applications, secure RESTful APIs, and role-based systems. Proficient in **React.js, Node.js, MongoDB, JWT authentication and Tailwind CSS**

TECHNICAL SKILLS

Frontend	: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive UI, React Hooks
Backend	: Node.js, Express.js, RESTful API Development, API Integration, MVC Architecture
Authentication	: JWT Authentication, Role-Based Access Control(RBAC),Input Validation, Secure API Practices
Databases	: MongoDB (CRUD Operations, Schema Design), MySQL (Basics)
State Mgt.	: React Context API, Redux Toolkit
Databases	: MongoDB (CRUD Operations, Schema Design), MySQL (Basics)
Soft Skills	: Team Collaboration, Problem-Solving, Attention to Detail, Time Management, Adaptability

EXPERIENCE

Jr. Full Stack Developer <i>Osumare Marketing Solutions</i>	May 2025 – Present <i>Full Time – Kharadi, Pune, Maharashtra</i>
- Designed and developed a scalable real estate management platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), managing 500+ property listings and streamlining end-to-end lead generation workflows. - Architected 10+ RESTful APIs with JWT authentication and RBAC, enabling secure role-based data access across 3 user types (Admin, Accountant, Legal Team) and reducing unauthorized access risk. - Built 3 role-specific dashboards (Admin, Accountant, Legal Team) that reduced manual data handling time by 40% and streamlined cross-team workflows. - Converted 15+ Figma design mockups into responsive, reusable React.js components using Tailwind CSS, ensuring pixel-perfect UI consistency across all screen sizes.	
Software Engineer <i>Tata Consultancy Services</i>	Feb 2022 – Nov 2023 <i>Hinjewadi, Pune, Maharashtra</i>
- Developed 20+ responsive, accessible UI components using React.js, JavaScript (ES6+), and Tailwind CSS for enterprise-grade web applications serving large-scale user bases. - Contributed to data annotation and QA pipelines, preparing labeled datasets that improved machine learning model accuracy by 15% and enhanced overall workflow efficiency.	

EDUCATION

University of Solapur <i>Bachelor's of Computer Applications (BCA)</i>	Solapur, Maharashtra <i>August 2018 – May 2021</i>
--	---

PROJECTS

Mini GitHub Clone (CLI + Full Stack System)	<i>Node.js, Express.js, MongoDB, React.js, Yargs</i>	Source Code
- Built a custom version control system (VCS) with CLI support (init, add, commit, push, pull, revert) using Yargs. - Engineered backend logic for file tracking, commit history, branching, version control, and rollback features using RESTful APIs and MongoDB schema design.. - Developed a full-stack visualization layer with React.js for repository browsing, ensuring scalable, modular architecture and clean separation of concerns.		
Personal Chat App	<i>Next.js, React Native, Node.js, MongoDB, Redis, Socket.io, TypeScript</i>	Source Code
- Built a full-stack, end-to-end encrypted chat application with both web (Next.js) and mobile (React Native/Expo) clients, using AES-256-GCM encryption on the client side so the server never has access to plaintext messages. - Architected a real-time messaging system using Socket.io with offline message queuing and automatic sync on reconnection, ensuring zero message loss across network interruptions. - Implemented a QR-code-based mobile login flow using Redis-backed single-use tokens (5-minute expiry), enabling passwordless authentication across devices.
